

Xenetech Projects Project 133

Example Variable Data Entry using Method #2

1. Layout a job with an individual plate size of 1x3 and a multiple plate size of 3x6 with three lines of text as shown here.

2. **Page | Full View** from the menu bar to display the multiple plate.
3. **Xenetech | Notepad** from the Menu Bar to call up the Windows™ Notepad.
4. In the notepad, type in the following lines pressing after each line.
 - Bill Hicks
 - Mngr
 - Cherry Wills
 - Asst Mngr
 - Sue Williams
 - Owner
 - Terri Jones
 - Cashier
 - Bob Jenkins
 - Trainee
 - Willie Shoer
 - Asst Mngr
5. [Following from NotePad menu not the Xenetech menu] **File | Save As...** and type in *NAMES* as the name of the text file to save. Note: the *.TXT* extension will be added automatically. By default the file is saved in the *C:\XFILES\TXT* file folder; we recommend that you do not change this default.
6. **File | Exit** to shut down the NotePad.
7. Now back in the Xenetech layout program, press the (from the numeric keypad *not* the top row of keys) until the word *Person* is selected. Hold down the and press again to add *Title* to the selection [That is, both *Person* and *Title* are now selected for replacement.].
8. **Misc | CopyInput** from the menu bar.
You will be told that you are about to do a Copy Input; .
9. From the list of filenames available in the file list box on the left, select the *NAMES.TXT* which you saved in a previous step then .
10. Nifty, Huh?

<p>Bill Hicks Mngr <i>TACO QUEEN OF DENVER</i></p>	<p>Cherry Wills Asst Mngr <i>TACO QUEEN OF DENVER</i></p>
<p>Sue Williams Owner <i>TACO QUEEN OF DENVER</i></p>	<p>Terri Jones Cashier <i>TACO QUEEN OF DENVER</i></p>
<p>Bobbi Jenkins Trainee <i>TACO QUEEN OF DENVER</i></p>	<p>Willie Shoer Asst Mngr <i>TACO QUEEN OF DENVER</i></p>
